

Plastic Waste Segregation Changes!

Change ① Recyclable Plastics

In line with the segregation changes, **Plastic Container and Packaging Waste** will be renamed to **Recyclable Plastics**.

Plastic items not bearing the *Plastic Mark*  be discarded in the designated garbage bags together with plastic containers and packaging as recyclable plastic as long as they are made of 100% plastic. We ask residents to dispose of these items in designated garbage bags to allow them to be recycled as a valuable resource.

Pack them together in a designated garbage bag for disposal.

※Items that fall under bulky waste should be disposed of separately even if they are 100% plastic. Products composed of materials other than plastic should be disposed of as **Plastic Composites**.

Change ② Plastic Composites

In line with the segregation changes, **Plastic Waste** will be renamed to **Plastic Composites**.

Toys (battery-operated items are considered home appliances), clothespins, clothespin hangers, futon pegs, ballpoint pens, mechanical pencils, and other items made partly of non-plastic materials or 100% plastic products that cannot be thoroughly cleaned.

Announcement ① We will be holding a waste segregation seminar.

We will conduct a seminar to address the changes to the waste segregation scheme in December 2024.

The date, time, and venue will be announced in the December issue of the Chiryu newsletter.

Announcement ② Garbage Disposal Guidebooks to be Distributed

A garbage disposal guidebook with detailed instructions on how to segregate waste will be delivered to all households in March 2025.

Website with info. on the plastic segregation changes →

We're changing the way we segregate plastics so **we can recycle more things!!** We'll also be changing the design for the designated garbage bags but **you can still use the ones you already have.**
