

Results of the Parental Questionnaire in Chiryu City SY-2021

◆ Outline and Target of the Survey

- All Parents (of): 7 Elementary Schools (5th Grade) • 3 Junior Highschools (2nd year)
- Date: November ~December, 2021
- Response Number of Survey: Targets 1 2 6 2 (ES643 JH619) No. of Valid Response: 8 7 6 (ES500 JH376) Effective Response Rate 6 9.4 %

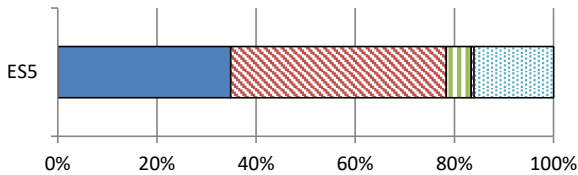

◆ Results of Survey (It is divided by the following patterns) ※ The number of unanswered is deducted from the number of responses.

Q1. To what extent are you satisfied with the facilities or institutions in Chiryu City?

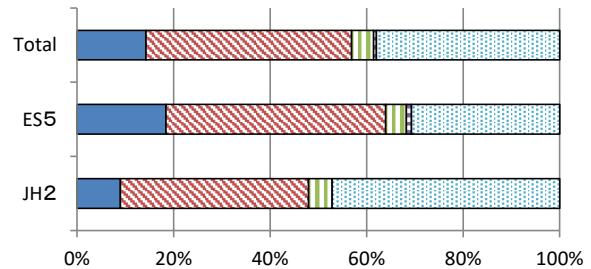

(1) Implementation of less than 35 Classes up to the 6th grade of Elementary School

※ Chiryu City's own class of 35 students in the 4th to 6th

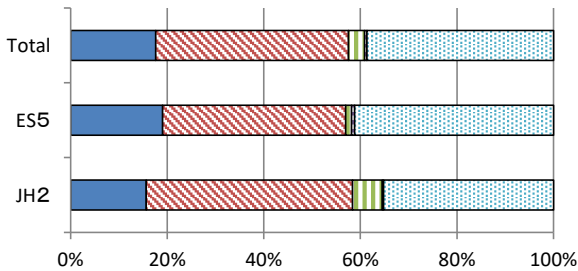

(2) Implementation of two-person support

※ 「Support for Children Teachers」、 「Heart Counselor」、 「Support Assistant for Children with Developmental Disabilities」、 「Foreign Lecturer in English Activities・Foreign Languages」、 「School Book Promoter」

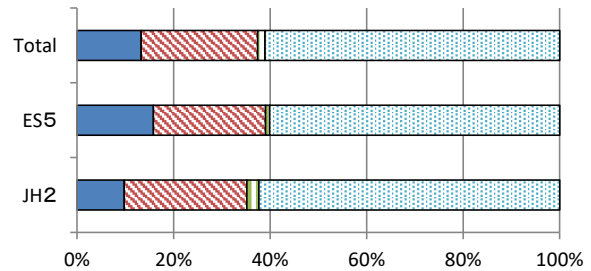

(3) Musubiai Classroom

※ Management of Classrooms so that truant children can return to normal school life

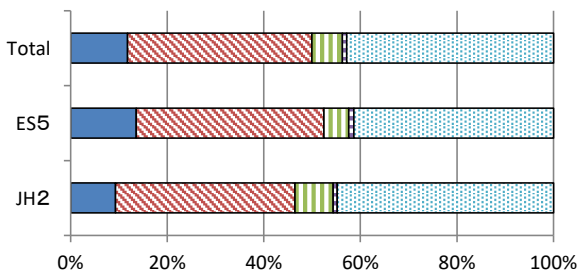

(4) Kakitsubata Classroom

※ A classroom where you can adapt to Basic Japanese Teaching and Japanese School Life for Foreign Students who have just come from abroad

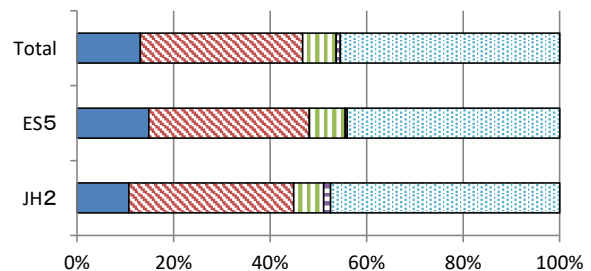

(5) Attractive School Design Business

※ Special Initiatives by each school, such as Guest Teachers when learning experiential activities and traditional culture and highschool tours.

(6) Promotion of the GIGA School Concept

※ Lending Tablet Terminals, such as Classes using ICT devices

◆ Overall, the measures related to the placement of people in Chiryu City such as "Implementation of small mathematics classes in Elementary Schools" and "Allocation of support staff for children with developmental disabilities" were highly evaluated overall. In addition, "Very Satisfied" and "Slightly Satisfied" account for about 60% of the total "Placement of Musubiai Classrooms", and it turns out that many people recognize it. We will continue to expand our current initiatives and aim to support and implement educational activities closely with each child in Chiryu City.

◆ However, regarding the establishment of Kakitsubata Classrooms, there was about 60% response rates that answered "I don't know / I don't understand", and some of Chiryu City's support for foreign children was not well recognized yet. In the future, We found out that it is necessary to disseminate Chiryu City's efforts in an easy-to-understand manner.

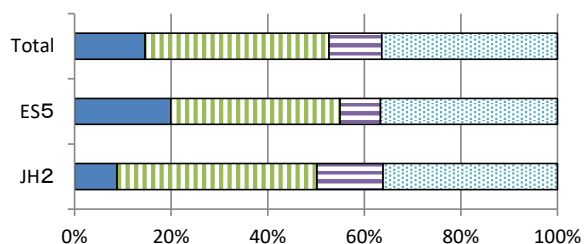

◆ Regarding the "GIGA School Concept", it has just begun, but about half of them were "Very Satisfied" and "Somewhat Satisfied". In the future, we will promote educational activities using ICT devices such as tablet terminals for classes and learning to take it home more than ever before.

◆The results of the survey (divided by the following patterns) ※No answer is deducted from the number of times answered.

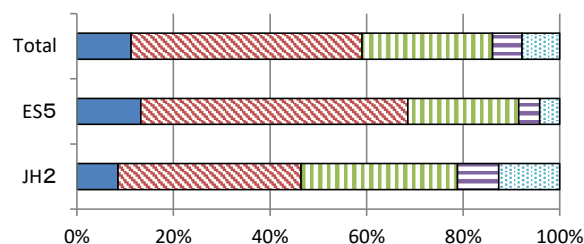

Q2. To what extent are you satisfied with the education of Chiryu City's School?

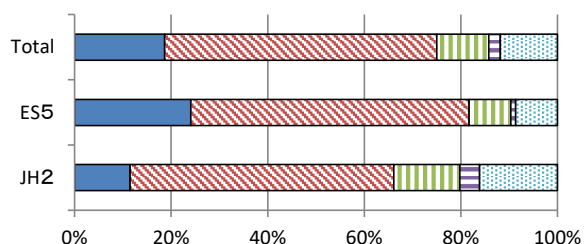

(1) Study Level

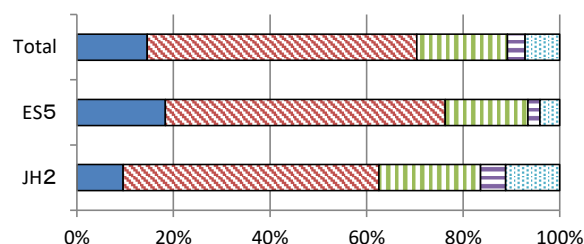

(2) Contents • Amount of Homework and Assignments

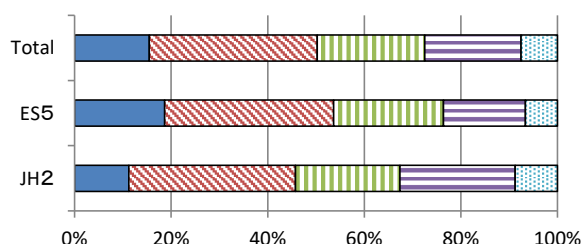

(3) Cultivating a passionate heart and a rich mind, and efforts to the classroom life

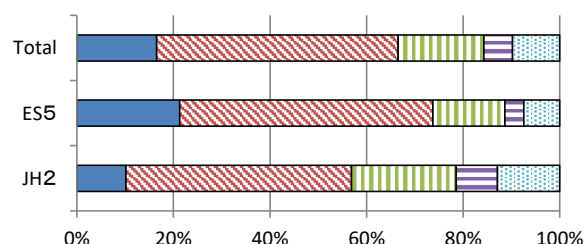

(4) Efforts to build physical strength and health

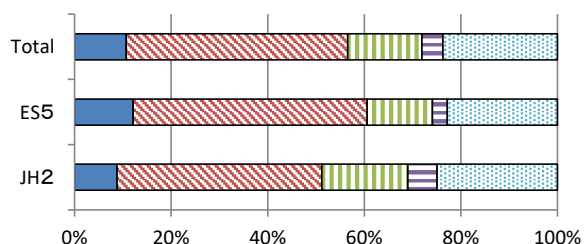

(5) Implementation of the 2nd (second semester system)

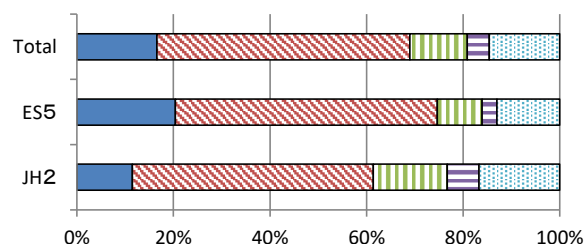

(6) Qualities and leadership skills and education

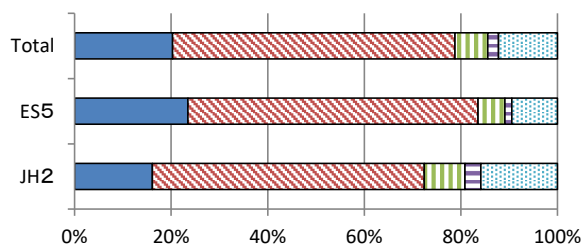

(7) Anti-bullying and truancy measures, Informations, moral guida

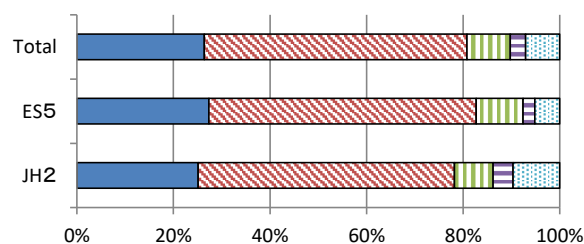

(8) Building an open school

(9) Creating safe and secure school

(10) Measures against the new coronavirus infection

◆For school education activities, there was about 80% of the recovery rate of "Very Satisfied" and "Slightly Satisfied" of "Cultivating a passionate heart, a rich mind, efforts to educate life" and "Creating a safe and secure school". In Elementary and Junior Highschool students, we will continue to train children who can cherish themselves and those around them. Children who can cherish their own lives. Children who can think and act on their own, so that the children will live a safer and secure school life.

◆Regarding "New Coronavirus Infection Counter-measures", "Very Satisfied" and "Slightly Satisfied" answers were more than 80%. We are worried about infection control in the future. At school, we will take as much infection counter-measures as possible in school life as well as basic infection measures such as hand washing and ventilation, and to enrich learning using ICT devices such as tablets so that we can respond in case of emergency.
